- Les verres minéraux et les plaques minérales VERLUX (à l'exception des verres "MMV" pour réveils et pendules) sont tous trempés chimiquement contre la rupture. Cette qualité ne se voit pas en regardant le verre et pourtant, elle est très importante pour éviter tous problèmes. Grâce à un procédé de trempe bien contrôlé en cours de fabrication, les verres sont moins fragiles et résistent aux chocs et les plaques ne cassent pas pendant le travail de meulage sur les machines à copier telle que la KRONOGLASS.
  En conclusion, ce n'est pas seulement le prix mais surtout la marque du verre qui est importante. VERLUX garantit cette qualité.

- *I vetri minerali e le lastrine minerali VERLUX (ad eccezione dei vetri MMV per sveglie e pendole) sono tutti temperati chimicamente contro la rottura. Questa qualità non si nota guardando il vetro e perciò è molto importante per evitare ogni problema. Grazie ad un procedimento di tempera ben controllato durante la fabbricazione, i vetri sono meno fragili e resistono ai colpi e le lastrine non si rompono durante il lavoro di molatura sulle macchine per copiare, quali la KRONOGLASS.*
  In conclusione, non è soltanto il prezzo ma soprattutto la marca che è importante. VERLUX garantisce questa qualità.

- *Los cristales minerales y las Placas minerales VERLUX (con excepción de los cristales MMV para despertadores y penduletas) son todos tratados químicamente contra la ruptura. Esta particularidad no puede verse al mirar el cristal, sin embargo, es muy importante para evitarse problemas. Gracias a un procedimiento de temple constantemente controlado durante la fabricación, los cristales son menos fragiles y mas resistentes a los golpes. Las placas no se rompen cuando se trabaja con las maquinas de cortar, utilizando la KRONOGLASS.*
  En consecuencia, no es solo el precio, pero tambien la marca del cristal es importante. VERLUX garantiza esta calidad.

- *VERLUX mineral glasses and VERLUX mineral glass plates are - with the exception of the glasses for alarm clocks MMV - chemically tempered against breakage. This property cannot be seen when looking at these glasses. However, it is very important for the manufacture without any problems. Due to ionic exchange which is well controlled during the manufacture, the glasses are highly stressed. Therefore they are shock-resistant and the plates can be processed wet on the copying machines, i. e. KRONOGLAS.*
  Therefore we ask you always to pay regard to the trade mark VERLUX.

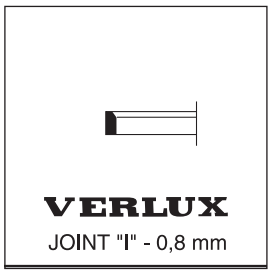
JOINTS I + L

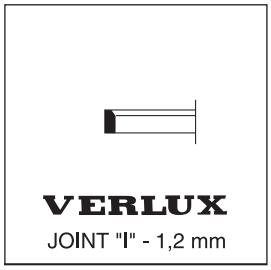
GUARNIZIONI I + L - JUNTAS I + L - Gaskets I + L



140 ... 340 + 345

- **Les joints I hauteur 0,8mm** (épaisseur 0,35mm) pour les verres minéraux minces.
- ***Le guarnizioni I altezza 0,8 mm*** *(spessore 0,35mm), per i vetri minerali sottili.*
- ***Las juntas I altura 0,8mm*** *(grueso 0,35mm), para los cristales delgados.*
- ***" I " Gaskets height 0,8mm*** *- thickness 0,35mm.*

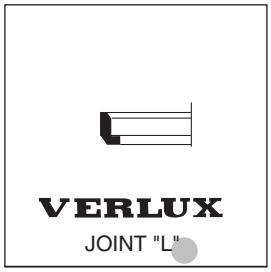
La dimension d'un joint correspond au diamètre de la carrure.
L'écart entre un joint I 0,8 et un verre est de 0,6 mm.



250 ... 327
330 - 335 - 340 - 345
350 - 355 - 360 - 365
370 - 375 - 380 - 385
390 - 395 - 400 - 405

- **Les joints I hauteur 1,2mm** (épaisseur 0,40mm) pour les verres minéraux épais sur certaines montres de plongée avec lunette tournante.
- ***Le guarnizioni I altezza 1,2 mm*** *(spessore 0,40mm), per i vetri minerali di spessore su certi orologi da polso con lunetta girevole.*
- ***Las juntas I altura 1,2mm*** *(grueso 0,40mm), para los cristales minerales gruesos y en algunos relojes submarinos, con bisel giratorio.*
- ***" I " Gaskets height 1,2mm*** *- thickness 0,40mm.*

La dimension d'un joint correspond au diamètre de la carrure.
L'écart entre un joint I 1,2 et un verre est de 0,7 mm.



175 ... 365 (N° 0 & 5)

- **Les joints L** pour les verres minéraux épais.
- ***Le guarnizioni L*** *per i vetri minerali spessi.*
- ***Las juntas L*** *para los cristales minerales gruesos.*
- ***" L " Gaskets***

La dimension d'un joint correspond au diamètre de la carrure.
L'écart entre un joint L et un verre est de 11 mm.

Nos joints sont également livrables en assortiments :

- JOINTS "I" 0,8	2 pièces des 60 numéros les plus courants
- JOINTS "I" 1,2	2 pièces des 78 numéros les plus courants
- JOINTS "L"	2 pièces des 30 numéros les plus courants

Le nostre guarnizioni sono ugualmente disponibili in assortimento :

- GUARNIZIONI "I" 0,8	2 pezzi di 60 misure più correnti
- GUARNIZIONI "I" 1,2	2 pezzi di 78 misure più correnti
- GUARNIZIONI "L"	2 pezzi di 30 misure più correnti

Nuestras juntas se sirven tambien en surtidos :

- JUNTAS TIPO "I" 0,8	2 piezas de los 60 números mas corrientes
- JUNTAS TIPO "I" 1,2	2 piezas de los 78 números mas corrientes
- JUNTAS TIPO "L"	2 piezas de los 30 números mas corrientes

Gaskets can be supplied set :

- I Gaskets 0,8	2 pieces of 60 current diameters
- I Gaskets 1,2	2 pieces of 78 current diameters
- L Gaskets	2 pieces of 30 current diameters

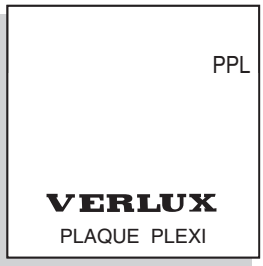
PLAQUES PLEXI

LASTRINE PLASTICA - PLACAS PLEXI - SHEETS PLASTIC



- Plaques transparentes en plexi, pour tailler des verres de forme, à la main ou sur notre machine VERAPID. Les verres ainsi obtenus peuvent servir de gabarits sur la machine à fabriquer les verres minéraux.
- *Lastrine trasparenti in plex per tagliare i vetri di forma a mano o con la nostra macchina VERAPID. I vetri così ottenuti possono servire da sagoma sulla macchina per fabbricare i vetri minerali.*
- *Placas de plexi transparente para cortar cristales de forma, sea á mano ó con nuestra maquina VERAPID. Los cristales elaborados asi, pueden utilizarse como molde-matriz para hacer cristales minerales con la maquina correspondiente.*
- *Watch glass plates of ACRYLGLAS for self milling or filing of plain fancy glasses.*

40 x 40 x 0,8 mm
100 x 100 x 0,8 mm
40 x 40 x 1,1 mm
100 x 100 x 1,1 mm
40 x 40 x 1,5 mm
40 x 40 x 2 mm

- Les plaquesYPL en plexi très dur conviennent particulièrement bien à la fabrication des gabarits.
- *Le lastrine YPL in plastica molto dura vanno particolarmente bene per la fabbricazione delle sagome.*
- *Las placas YPL de plexi muy duro, son particularmente indicadas para fabricar matrices.*
- *For the milling of templates for grinding mineral glass, we recommend the particularly hard plates YPL.*

- L'épaisseur de la base est importante pour une bonne tenue du verre à jupe dans la boîte. Il faut donc mesurer aussi avec précision le diamètre intérieur et tenir compte que pour un même diamètre extérieur, il peut y avoir plusieurs diamètres intérieurs différents.
- *Lo spessore della base è importante per una buona tenuta del vetro a gonna nella cassa. Bisogna dunque misurare con precisione anche il diametro interno e tenere conto che per uno stesso diametro esterno, ci possono essere più diametri interni differenti.*
- *El grueso de la base es muy importante para que el cristal con asiento esté bien sujeto en la caja. En consecuencia, hay que medir con precision el diámetro interior y tener muy en cuenta, que con un mismo diámetro exterior, pueden haber diferentes diámetros interiores.*
- *With top glasses, the thickness of the base determines the tight fit in the case. Please note that there are different inside diameters (i. e. different thicknesses of the base) for one and the same outside diameter.*

VERRES DE FORME EN PLEXI

VETRI DI FORMA IN PLEX - CRISTALES EN PLEXI, DE FORMA - FANCY PLASTIC

Verres de forme ordinaires bruts, peuvent être retouchés facilement.
Vetri ordinari grezzi, possono essere ritoccati facilmente.
Ordinarios, no acabados, pueden retocarse facilmente.
Standard glasses can easily be reduced in size.

Verres genèves (cubic)
Vetri genèves (cubic)
Cristales genève (cubicos)
Concave glasses cannot be changed any more.

VERLUX offre un très grand choix de verres de forme en matière plastique, soit CUBIC (genèves), soit ORDINAIRE DE FORME (bruts). Les verres CUBIC sont livrés prêts à poser et ne peuvent pratiquement pas être retouchés (ils permettent un bon passage d'aiguilles). Les verres ORDINAIRE DE FORME sont livrés avec les bords bruts, plus grands que les dimensions indiquées sur les sachets et doivent être terminés à la lime pour être posés.
Nos verres de forme sont fabriqués par moulage à partir de plexiglass en plaques (contrairement à beaucoup d'autres qui sont fabriqués par injection), ce qui permet une tension plus grande sans risque de givrage et leur assure une meilleure résistance aux solvants.

VERLUX offre una grande scelta di vetri di forma in plastica, sia CUBIC (genèves) sia ORDINARI DI FORMA (grezzi). I vetri CUBIC sono forniti pronti per la posa e non possono praticamente essere ritoccati (permettono un buon passaggio delle sfere). I vetri ORDINARI DI FORMA sono forniti con i bordi grezzi, più grandi delle dimensioni indicate sui sacchetti e devono essere limati per essere posati.
I nostri vetri di forma sono fabbricati con molatura cominciando dal plexiglass in lastrine (contrariamente a molti altri che sono fabbricati per iniezione) ciò permette una pressione maggiore senza rischio di ghiacciatura e assicura una migliore resistenza ai solventi.

VERLUX ofrece un extenso surtido de cristales plexi tipo CUBIC (genève) ó CORRIENTES DE FORMA, cantos no acabados. Los CUBIC se sirven listos para colocar y prácticamente, no pueden retocarse (permiten que las minuteras pasen bien). Los CORRIENTES DE FORMA se entregan con los cantos no acabados. Son mas grandes que las medidas indicadas en las bolsitas y tienen que afinar y acabarse con la lima, para colocarse.
Nuestros cristales de forma se fabrican con molde con placas de plexi (contrariamente a muchos otros que se fabrican por injección), lo que permite una mayor tensión, sin riesgo de sintomas de escarcha, asegurando mayor resistencia.

VERLUX disposes of the largest assortment of plastic fancy glasses existing in the world.
Standard fancy glasses have got a crude border and they can easily be reduced in size with the file.
Concave fancy glasses have got a surrounding foot and their dimensions practically cannot be changed any more.

basic-groupe.com

LISTE DE CORRESPONDANCE

LISTA DELLE CORRISPONDENZE - LISTA DE EQUIVALENCIAS - KEY TO BRANDS AND CALIBES

- Lorsque nous connaissons les marques des montres auxquelles sont destinés nos verres spéciaux, nous le précisons sur les pochettes et sur le catalogue. Pour faciliter la recherche, nous éditons ci-après une liste de correspondance entre les références des verres de certaines grandes marques et celles des verres VERLUX
- *Allorché conosciamo le marche degli orologi ai quali sono destinati i nostri vetri speciali, noi lo precisiamo sulle bustine e sul catalogo. Per facilitare la ricerca, pubblichiamo qui di seguito una lista delle corrispondenze tra le referenze dei vetri di certe grandi marche conosciute e quelle dei vetri VERLUX.*
- *Cuando conocemos las marcas de relojes a los que van destinados nuestros cristales especiales, lo precisamos en nuestras bolsitas y en nuestro catálogo. Para facilitar la busqueda, editamos á continuación una lista de equivalencias de referencias de cristales de ciertas grandes marcas conocidas y referencias corres-pondientes de cristales VERLUX.*
- *As far as we know the watches and calibres, to which our special forms round correspond, we indicated these next to the drawings of the glasses. Unfortunately in many cases only the case manufacturer and not the watch brand is known. In this list you will find the watch glasses for these brands as they are contained in the catalogue. Further references and supplements will always be appreciated by the wholesale trade and the manufacturer.*

KRONOGLASS

10/400
Machine KRONOGLASS pour meuler les verres minéraux par copie de l'ancien verre ou d'un gabarit. Cette machine est livrable avec moteur électrique.
Le gabarit nécessaire à l'usinage du verre minéral est fait en résine.
La machine est livrée avec son réservoir et sa pompe de circulation d'eau, 1 flacon de résine K1 et 1 flacon de durcisseur K2 pour la fabrication des gabarits, 1 flacon d'huile émulsion K3 pour mélanger à l'eau, 1 pierre corindon K5 pour nettoyer les meules, 4 clefs et 60 plaques minérales MPL assorties.
À la page 13 vous trouverez la liste des plaques minérales MPL disponibles.

Macchina KRONOGLASS *per molare i vetri minerali per rifacimento del vecchio vetro o di un modello. Questa macchina è disponibile con motore elettrico.*
Il modello necessario alla lavorazione del vetro minerale è fatto in resina.
La macchina è disponibile con il suo serbatoio e la sua pompa di circolazione dell'acqua, 1 flacone di resina K1 e 1 flacone di indurente K2 per la fabbricazione dello modello, 1 flacone d'olio emulsionante K3 da mischiare all'acqua, 1 pietra corindone K5 per pulire le mole, 4 chiavi e 60 lastrine minerali MPL assortite.
Alla pagina 13 troverete la lista delle lastrine MPL disponibili.

Maquina KRONOGLASS *para cortar cristales minerales, copiando el cristal antiguo ó utilizando un molde-matriz. Esta maquina puede suministrarse con motor eléctrico.*
El molde-matriz necesario para hacer el cristal mineral, puede hacerse en resina.
La maquina se suministra con su depósito et su bomba de circulación de agua. Ademas los accesorios siguientes : 1 frasco de resina K1, 1 frasco de endurecedor K2 para hacer las matrices, 1 frasco de emulsion K3 para mezclar con el agua, 1 piedra corindon K5 para limpiar las muelas, 4 llaves, 60 placas minerales MPL surtidas.
En la pagina 13 encontrará la lista de las placas MPL disponibles.

KRONOGLAS - machine *with motor for grinding mineral glasses The copying milling machine KRONOGLASS is available with motor for halfautomatic grinding. The machine is constructed for grinding mineral glasses of all shapes, which additionally get a bevel on both sides.*
Before producing a fancy glass, a template has to be manufactured. A resin equipment is also delivered together with this machine.
The standard equipment contains the machine with tank and water circulation pump for the cooling, resin K1 and hardening liquid K2 for the manufacture of templates. A corundum stone K5, 4 keys and 60 assorted mineral glass plates MPL..
